Why do we need burning permits?

- To limit the amount of time volunteer firefighters spend responding to non-emergency calls and allowing them to focus on real emergencies.
- To prevent unnecessary emergency response from our Fire Departments that put them at greater risk for potential accidents.
- To limit the number of calls into our 911 Center so that our Communications Specialist can focus on your real emergencies.
- We track the locations of all activated burn permits in Ravalli County, so that our Communications Specialist may determine whether a smoke plume or reported fire is an emergency (such as a wildfire or structure fire) or a controlled burn.
- To handle the volume of burn calls coming into the 911 Center. In 2017, Ravalli County issued 5,887 Burn Permits and had 18,417 burn permit activations, which were all completed via the internet or the automated phone line. This is 23,304 calls that did not interrupt emergency phone calls coming into our 911 Center.
- To utilize technology to make the process of issuing permits, activating permits and tracking burn locations more efficient and cost effective for Ravalli County.

- If you do not activate your permit before burning, the 911 Center will be unaware that your fire is a controlled burn. The Fire Department and Law Enforcement may respond to your fire even though it is under control.
- If the fire escapes your control, you may be cited and fined. You also may be responsible for the cost of suppression and any damage to someone else's property.
